- 🔗 Portfolio • LinkedIn

PROFESSIONAL SUMMARY

Detail-oriented product designer with **8+ years of experience evaluating digital experiences** across web and mobile. Strong background in **assessing usability, clarity, and visual quality**, with a consistent track record of **identifying issues, edge cases, and improvement opportunities**.

Experienced in **reviewing complex systems**, applying **structured thinking**, and delivering **clear, actionable feedback**. Recently worked with **AI-assisted features**, evaluating **outputs and interaction quality** to ensure **reliability and usability**.

CORE STRENGTHS

- **Content & Output Evaluation:** Clarity, accuracy, usability assessment
- **Critical Thinking:** Identifying inconsistencies, edge cases, weak outputs
- **Editorial Judgment:** Strong sense of quality across text and UI
- **Attention to Detail:** High consistency across repeated evaluation tasks
- **UX & Visual Evaluation:** Layout, hierarchy, interaction quality
- **Structured Feedback:** Clear, concise, actionable input
- **AI & Assisted Systems:** Evaluating AI-generated outputs and flows
- **Tools:** Figma, FigJam, prototyping tools

PROFESSIONAL EXPERIENCE

Hashthink Technologies Inc. • Product Designer

Remote | 2024 – Present

- **Evaluated product features and UI outputs** across multiple SaaS platforms, identifying **usability issues and inconsistencies**
- **Reviewed and refined AI-assisted features**, assessing **output quality, clarity, and user impact**
- Provided **structured, actionable feedback** to improve interaction flows and reduce ambiguity
- Ensured **consistency across design systems** and cross-product experiences
- Collaborated with cross-functional teams to align on **quality standards and evaluation criteria**

Selected Work

mePro • AI Therapy Platform (Web + Mobile)

Multi-sided platform for therapists, clinics, and patients

- **Assessed AI-assisted interactions** for **clarity, safety, and usability**
- Identified **edge cases, inconsistencies, and weak outputs** in complex scenarios
- Refined interaction patterns to improve **reliability and user understanding**

→ Achieved **~78% preference vs. competitors** and early adoption

Certy • Workflow Automation Platform

- **Evaluated multi-step workflows** and identified **friction points and ambiguity**
- Improved clarity and reduced cognitive load through **structured feedback**

→ Reduced completion time by **40%**

Remitland • FinTech Platform

- **Reviewed onboarding and transaction flows** for **errors and usability gaps**

→ Reduced user errors by **25%**

Minto • Interactive Platform

- Analyzed **interaction behavior** and **engagement patterns**

→ Increased engagement by **50%**

Actimeety • Product Designer

Remote | 2024 – 2026

- **Evaluated user flows and interaction patterns** across a social platform
- Identified **usability issues and improvement opportunities** through iterative review
